

multi action anti-microbial, anti-bacterial
and anti-insect application

HealthGuard Vital Protection (Insect Repellent Application)

HealthGuard™ Vital Protection impregnation gives your customers the reassurance that treated products can help them to avoid nasty, itchy bites or - even worse - serious illness.

HealthGuard™ Vital Protection represents a breakthrough in repellents. The impregnation is anti-bacterial and a non-irritant. This means that there are no side effects, or safety issues.

In addition, articles treated with **HealthGuard™ Vital Protection** will inhibit odours and discolouration, and be free from microbial attack, therefore making them hygienic and durable.

Independent testing has recommended the use of **HealthGuard™ Vital Protection** as an insect repellent treatment for clothing.

HealthGuard Vital Protection (Anti-Bacterial & Anti-Microbial Application)

Millions of us suffer from asthma, allergies, eczema, sinusitis, psoriasis, rhinitis, emphysema and bronchitis. Research is indicating that those affected is on the increase. In one study, the number of children reporting an asthma attack in the previous year was almost three times as high in 1992 as it had been in 1982. Asthma and allergies can develop at any time of life. Two thirds of people develop symptoms during childhood, but some people can be in their sixties or seventies before development.

Moulds, Dust Mites & Bed Bugs

Moulds release tiny seeds called spores into the air. If we breathe these spores in, they can trigger asthma and allergy symptoms.

HealthGuard™ Vital Protection prevents infestation by dust mites on any treated article by acting as a contact repellent. **HealthGuard™ Vital Protection** destroys the dust mites' microbial food sources (such as yeasts, moulds and bacteria), preventing reinfestation and giving long-term protection. a unique dual-action product

This means that any **HealthGuard™ Vital Protection** treated article has been protected against the growth of a range of micro-organisms that can cause odours, staining, deterioration, discolouring in your products and allergies and asthma in your customers. These can include bacteria, fungi, yeasts, algae, mould, viruses and dust mites.

HealthGuard™ Vital Protection gives the comfort and assurance of the ultimate in safe hygiene and anti allergen to any item to which it is applied.

**HEALTHGUARD VITAL PROTECTION IS A COMPLETELY
UNIQUE TREATMENT THAT HAS BEEN CREATED TO HELP
PROTECT HUMANS AGAINST DISEASES, SUCH AS MALARIA
BY REPELLING MOSQUITOS AND OTHER BITING INSECTS.**
